Construction Impact Notice

Commencement of the Science Complex Project’s Site Fencing

To: Harbor Students, Faculty, and Staff

From: Arcadis

Date: June 10, 2010

Construction Start: Monday June 14, 2010 at 6:00 AM

What: Fencing of the new Science Complex construction site. Fence perimeter is outlined in the attached aerial photograph.

Impact: Although initially only selective fencing will go up, ultimately (over the course of the next several weeks) the entire 3 acre site will be fenced in. The impacts include loss of the temporary staff parking lot, construction traffic, noise, relocated pedestrian pathways to accommodate the site and other construction related issues. Everything possible will be done to minimize the inconvenience including the erection of sound walls and way finding signage.

Duration: Project is estimated to be completed by July 2012.

Contact Information: Please contact Rick Darling (310 221-8310) or Terrie Johnson (310-221-8303) with any questions or concerns.
