Our Mission: Los Angeles Harbor College fosters learning through comprehensive programs that meet the educational needs of the community as measured by student success, personal and institutional accountability, and integrity.

Part “A”

Program/Pathway Update

Program/Pathway: Health and Physical Educational Date: October 24, 2012

The Physical Education Program at Los Angeles Harbor College is dedicated to the support of the mission statement as presented by the Los Angeles Community College District and the Los Angeles Harbor College.

As one part of a comprehensive, well-balanced educational experience, physical education provides our students the opportunity to enhance their mental and physical abilities through lecture and physical activities, and intercollegiate sports.

Meeting the demand of our multicultural populations the Physical Education Department offers courses that have the potential to positively touch, steer, and impact students’ lives which will help students achieve knowledge, healthful living skills, critical thinking, and problem solving leadership for future success.

Assessment of six year plan from Program Review:

The Physical Education and Health Department planned a six year course offerings that covers all the courses needed to fulfill requirements for the Physical Education Transfer Model Degree and the Skills certificate in Physical training. The plan also included the offerings of athletic courses that are mandated for Intercollegiate Athletic Sports for the season the sport is scheduled. Planned course offerings do not change from year to year due to the reduction of offerings during the last two years and also due to the non- prerequisite courses offered. Additional cuts will be implemented for Spring, 2013 which will keep the plan on target regardless of how many courses will be reduced.
What areas of the program need strengthening?

- Need full-time instructor/head coach
  - The PE Department has lost over 18 Full-time instructors in the past 20 years and who have not been replaced, leaving the department with a total of 3 Full-time instructors.
  - Full-time instructors teach only 12.9% of the total course sections offered, while the adjunct faculty teaches 79.1% of the remaining sections.
- Need of additional classes and sections
  - To fulfill the needs for the New Associate of Arts Degree in Physical Education and the Skills Certificate in Fitness Training.
- Update equipment
  - Due to constant repair and maintenance to equipment for the safety of the students.
- Increased supplies budget for instructional use
  - Demand for upgrading instructional equipment due to modern technology, requires an increase in budget from $3,500 to $10,000.

What are the strengths of the program?

- Flexible schedule of classes
- Instructors with up-to-date knowledge of instructional material
- Dedicated instructors to their student’s success
- Construction of new Athletic fields
- Unity of the three programs (Adaptive P.E., Physical Education and Athletics) in providing a positive environment for student success

Summarize program and unit plan modifications necessary for program improvement, including objectives, budgets, and timelines for implementation.

The Unit Plan has been modified and updated to fit the needs of the department. Priorities have been organized, changed, voted on and readdressed for the past three years. The need of additional instructors still tops the list of priorities. The department hired two new instructors, but at the same time two instructors retired which kept the number of Full-time instructors at the same ratio. The objectives of the department have also changed:

- Kinesiology and Health will be the new name for the department by Fall 2013
- Implement the new Skills Certificate in Training, ongoing process.
- Develop Officiating Certificates in kinesiology for all sports, by Fall 2014.
- Reintroduce the entire courses as Kinesiology courses by Fall 2013
- Update all the courses to reflect a four Level course offering by Fall 2014.
- Develop new SLO’s for the new kinesiology courses by Fall 2013.
- No budget is needed, All is part of Full-Time instructors obligations.
Activities to address program needs:

* Implement the objectives developed by the department, transfer all PE courses to kinesiology.

* Create an online orientation demonstration for the Weight Room class.

* Introduce Intramural Sports activities in cooperation with the ASO office.

* Fundraise for equipment maintenance and for additional supplies and activities.

* Reintroduce the Annual Walk-A-Thon event for Adapted Kinesiology Program.

How are your program improvements associated with your Program SLOs:

The Physical education and Health Program SLO’s will be redefined and updated to fit the needs of the new Kinesiology and Health Pathway. All of the Physical Education courses have been Archived; we are in the process of converting all these courses to Kinesiology, which in turn will require new updated SLO’s and new assessments for all.

Student Learning Outcomes

Students who successfully complete a course in Health or Physical Education shall be able to:

- Develop their critical thinking and increase their abilities to problem solve.
- Increase their knowledge of physical activities and human life span in order to reduce mortality rate.
- Develop a healthful life style which will lead them to healthier and more productive future.
- Develop leadership skills and promote their abilities to climb the latter of success.
- Increase self-confidence, maturity, communication, teamwork as well as knowledge of working with multicultural people, which in turn will reduce risk factors for dysfunctional personality and multiple types of addiction and abuse.

Staffing requirements:

1. Hire Full-time instructor, due to the loss of 18 full-time instructors. The department hired two full-time instructors, one in health and the other in kinesiology. However, the kinesiology Department lost two instructors for retirements. The department is still lacking on the number of instructors needed to develop and offer the many certificates that we wish to make available for our students. This addresses our college goal #1, Learning and Instruction.
2. The Department needs to hire a Women Facility attendant to replace the attendant who passed away five years ago and was not replaced. Title IX issue.
3. The Department has no office assistance to serve the needs of instructors and students.

Technological requirements:

The kinesiology Department is housed in a new facility that is technology friendly and equipped with up to date classroom equipment.

Facilities requirements:

The new Wellness Center is sufficient for the department needs at this time.

Implementation plan:

*Activities will implemented through efforts of Full-Time instructors as part of their obligations as Full – timers, and through Fundraising proposals which will pay for supplies and other activities.

<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>304 hours</td>
<td>$487,280</td>
<td>6000 FTES</td>
<td>HAAA1b</td>
</tr>
<tr>
<td>1.0 FT Women Facility Attendant (needed)</td>
<td>$35,000.00 (no hire yet)</td>
<td>Title IX Requirement</td>
<td>HCSS1</td>
</tr>
</tbody>
</table>

Narrative justification: List statutes which require this expenditure.

No Legally required responsibilities or licensing agreements.

*The Adapted Physical Education Courses must be taught by a qualified certified instructor with special credentials.

* The Full –Time Women Facility attendant is essential to meet Title IX requirements. The college currently has Men Facility Attendant but no WFA to assist the majority of Harbor students which happens to be women.

Total cost: $35,477

Justification Narrative: How does your activity support the college Educational Master Plan?

- A full time instructor is needed to develop new CTE certificates.
- A Woman Facility attendant is needed since currently there is a men facility attendant assisting male students. Title IX issue.
- The department receives Zero dollars for supplies and instructional materials.

**Justification:** How does your activity support the college Educational Master Plan?

The college prides itself on Student success. The mission of the college is to foster learning through comprehensive programs that meet the educational needs of the community. Matriculation is critical for our students. Changing Physical Education to kinesiology and redeveloping all the physical education courses would serve students who transfer to four year universities that offer kinesiology as Majors. Physical education / Health positively touch, steer, and impact student’s lives which help students achieve knowledge, healthful living skills, critical thinking, and problem solving leadership for future success.
